

53' domestic containers, 40' and 45' international containers, and ramp and port drayage. One seamless solution.

XPO is the third largest intermodal provider in North America, and a leader in cross-border Mexico intermodal, where we have more than 30 years' experience.

We offer you one of the largest and most accessible intermodal networks in North America: XPO controls over 9,400 53' domestic containers for the exclusive use of our customers. In addition, we have access to another 65,000 EMP and UMAX 53' containers, and over 50,000 units in our small box program. The quality of our drayage capacity, together with our dispatch and tracking technology, are valuable levers for on-time performance in the challenging environments of ramps and ports.

LARGE DRAYAGE CAPACITY

XPO has contracted intermodal drayage capacity of over 2,200 independent trucks, and network access to over 25,000 additional drayage trucks. When contracting with independent fleet owners and drivers, we look for experienced, safety-conscious professionals with a strong sense of customer service.

Capabilities

- Terminals at every key ramp and port
- Intermodal rail ramp drayage
- TWIC-compliant port drayage
- Ocean drayage management services
- Certified HAZMAT handling
- Access to XPO's diversified base of over 38,000 carriers

INTENSE COMMITMENT TO CUSTOMER SERVICE

We spend \$425 million a year on technology that drives world-class service for our customers.

Our Rail Optimizer system provides our intermodal team with a suite of proprietary tools for seamless, door-to-door movements of long haul freight. We use EDI integration to secure capacity, and facilitate constant communications with the railroads—not only to schedule the freight, but also to alert our customers about any unforeseen delays such as weather disruptions.

Ultimately, it's our fierce commitment to on-time performance that turns capacity into solutions for you. We focus on providing you with visibility, follow-through and communication.

280 TRUCKLOADS of freight can be carried by a single freight train at one time.

Intermodal and Drayage solutions and service

North American coverage

CROSS-BORDER MEXICO

XPO has over 30 years' experience managing cross-border freight, with an extensive organization in both Mexico and the United States, highlighted by personnel at key Mexico rail ramps to simplify the complexities of international freight. We utilize our longstanding relationships with the railroads, ramp operators and drayage drivers on both sides of the border to make sure that rail is not only more cost efficient for you than trucking, but also more seamless for imports and exports.

Manufacturers, in particular, need a reliable cross-border provider with the deep resources of XPO. Billions of dollars are being invested in near-shoring so that manufacturers can locate in Mexico and gain labor efficiencies and speed to market. As high volumes of raw materials and parts flow into Mexico, and finished goods flow out, our intermodal capacity will continue to be a supply chain staple.

Should an unavoidable rail delay occur, XPO's cross-border experts in expedited and global forwarding will move quickly to clear your freight through customs and navigate any challenges.

Our ability to pivot from one service to another in unpredictable circumstances is a unique advantage of using XPO.

MEXICO HEADQUARTERS:

Bldv. Avila Camacho 40-1402
Lomas de Chapultepec
México, DF 11000
(55) 5202-2488

One of the largest and safest drayage networks in the United States

- Approximately 10,000 53-ft. boxes and 8,000 chassis exclusively controlled by XPO, and access to small box capacity
- Leading U.S. drayage capacity of 2,200 contracted independent owner-operators
- HazMat or tank certifications held by majority of contractors
- Access to over 25,000 additional drayage trucks
- Network of over 40 terminals serving every major U.S. rail ramp and port
- Large Mexico-based chassis fleet and ramp personnel
- Cross-docking and transloading
